

Lab 9 – Distribute an App

CS235AM, Intermediate Mobile Application Development: Android

This lab will give you practice distributing an application for testing and ultimately for publication.

Instructions

1. Add launcher icons and do anything else necessary (like using the correct package name) to publish your app to an app store.
2. Create an archive (APK file) of your app and sign it.
3. Create an account on an app store or app testing site and upload it. You can use any of these three:
 - a. the Google Play Store, via the [Google Play Console](#)
 - b. the Amazon App Store, via the [Amazon Developer Console](#)
 - c. [Diawi](#) - Development & In-house Apps Wireless Installation web site

Submission

The Moodle assignment will allow you to enter online text. Enter the URL that can be used to download your app for testing.
